Classification tree for sub-types of Cerebral Palsy

Is there persisting increased muscle tone in one or more limbs?

- N
  - Are both sides of the body involved?
    - Y
      - Spastic Bilateral
    - N
      - Spastic Unilateral
  - N
    - Is there generalised hypotonia with signs of ataxia?
      - Y
        - Ataxic CP
      - N
        - Non-classifiable

Is the tone varying?

- N
  - Spastic Bilateral
  - N
    - Is there generalised hypotonia with signs of ataxia?
      - Y
        - Ataxic CP
      - N
        - Non-classifiable

- Y
  - Dyskinetic CP*
    - Reduced activity - tone tends to be increased
      - Dystonic CP*
    - Increased activity - tone tends to be decreased
      - Choreo-Athetotic CP*
  - Non-classifiable
